

# Kroger (GA525) Stormwater Quality Unit

## Design

## Structure Description

(2) Aqua-Swirl – AS-8

## Contractor

Grading Contractor: Blount Excavating

## Comments

The Aqua-Swirl Stormwater Quality Unit has become a preferred treatment unit of Kroger and other owners around the nation due to the ease of installation and the ability to treat the Stormwater. The two AS-8 units weighed approximately 6,000 lbs each and the base units are installed completely intact. This means that there are no other pieces to be installed and coordinated at a later date.
