

University of Tennessee – Music Center Rainwater Harvesting System

Design

Material Description

(60) StormTech 3500 Chambers and End Caps

Engineer

Cannon & Cannon, Inc. – Jeff Beckett
www.cannon-cannon.com

Contractor

General Contractor: Johnson&Galyon Construction
Grading Contractor: Blount Excavating

Comments

This Rainwater Harvesting system included the use of the StormTech 3500 chambers in conjunction with an impermeable liner and a pump system to capture rainfall from the roof of the Music Center and the front lawn and store for use in irrigation. The total installation time of the StormTech Underground Detention System was 4 working days.
